Notes:

- 1Readings were taken prior to active extraction system startup on 10/4/2002.
- 2Active extraction system shutdown after readings were taken on 1/20/2003.
- <sup>a</sup>Not installed at the time.
- <sup>b</sup>Monitoring conducted on 1/20/2003 was limited to all wells within 200 feet of active extraction systems located at Passive Vent 1 and EX3.
- EXExtraction Well
- GGRRGolden Gate Railroad
- GMPGas monitoring probe
- IDIdentification
- UCSFUniversity of California, San Francisco
- A gray shaded field in the table indicates that no limit was established for these GMPs for stopping the extraction process. Each GMP is evaluated individually.
